## SKILLS

- Dart
- **C++**
  **OOP**
- **SOLID Principles.**
- Git & GitHub
- **Architecture Pattern (Clean Architecture, MVVM)**
- Provider
- Bloc
- Localization
- Firebase
- Http
- Dio

## PROJECTS

### Route e-commerce

https://github.com/Ebrahim-Elnaghy/Ecommerce

"Route e-commerce" is a mobile application built using Flutter and Dart, aimed at creating an intuitive and user-friendly e-commerce platform. The project's goal was to develop a fully functional e-commerce app that allows users to browse, search, and purchase products from various categories.

Technologies Used:

Flutter
Dart
Clean Architecture
Bloc pattern
Dio
ScreenUtil
SharedPreferences

### Movies

https://github.com/Ebrahim-Elnaghy/MoviesApp

The "Movies" project is a mobile application developed with Flutter and Dart, focusing on providing users with an immersive movie browsing and discovery experience. The app was designed to showcase movie information, trailers, ratings, and reviews to help users make informed decisions about their movie choices.

Technologies Used:

Flutter
Dart
Clean Architecture
Bloc pattern
ScreenUtil
Firebase Cloud Firestore

### Bookly

## Certifications

**Programming Fundamentals Course at Route**

**Flutter Course at Route**

## Experience

### Freelance Flutter Developer | 2022 - Ongoing

- Worked as a freelance Flutter Developer, collaborating with clients on various mobile app projects.
- **Communicated with clients to understand project requirements, provide progress updates, and address any concerns.**
- **Implemented and utilized architecture patterns (Clean Architecture, MVVM) to ensure scalability and maintainability of code.**
- **Utilized Git and GitHub for version control and collaborative development with clients and other team members.**

## Language Skills

**Arabic (Native)**

**English (Intermediate)**

## EDUCATION

**Management Information Systems**

2018 – 2022

"Bookly" is a mobile application developed using Flutter and Dart, designed to provide users access to a vast library of books. The app serves as a digital bookstore, allowing users to explore a wide range of books, search for specific titles, view book details, and purchase books online. The project's goal was to create a user-friendly and immersive book shopping experience for users.

Technologies Used:

Flutter
Dart
MVVM (Model-View-ViewModel) architecture
Bloc pattern
Dependency Injection
url_launcher (for opening URLs)
Dio
